[CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.]

Hi Meaghan,

I have reviewed the NHIS regarding the above project. There are no new records in the vicinity of the project. As such, the Natural Heritage letter dated April 2, 2018 is valid until April 11, 2020.

Thank you for consulting us on this matter. If you have any further questions, please feel free to contact me.

Have a great day,

Samantha Bump

Subject: Wolf Creek EAW: DNR NHIS Concurrence Request (previous request # ERDB 20180373)

Good afternoon Ms. Joyal,

Attached is our DNR NHIS concurrence request letter, figures, and NHIS database results spreadsheet from conducting a query under our license agreement. The query was performed for the Wolf Creek private car track project in Forest Township, Rice County. The site location is also provided as a shapefile. We are requesting your concurrence on our findings in order to complete the EAW and put it on public notice in the near future. Please let us know if the information we are providing is sufficient and any feedback you may have for future NHIS concurrence requests of this type.

Please contact me with any questions or concerns. I appreciate your consideration.

Thank you,

Meaghan Watson

RE: Natural Heritage Review of the proposed Wolf Creek Driving Club,
T111N R21W Sections 12 & 13; Rice County

Dear Mr. Madejczyk,

As requested, the above project has been reviewed for potential effects to known occurrences of rare features. Given the project details provided with the data request form, I do not believe the proposed project will negatively affect any known occurrences of rare features.

The Natural Heritage Information System (NHIS), a collection of databases that contains information about Minnesota's rare natural features, is maintained by the Division of Ecological and Water Resources, Department of Natural Resources. The NHIS is continually updated as new information becomes available, and is the most complete source of data on Minnesota's rare or otherwise significant species, native plant communities, and other natural features. However, the NHIS is not an exhaustive inventory and thus does not represent all of the occurrences of rare features within the state. Therefore, ecologically significant features for which we have no records may exist within the project area. **If additional information becomes available regarding rare features in the vicinity of the project, further review may be necessary.**

For environmental review purposes, the results of this Natural Heritage Review are valid for one year; the results are only valid for the project location (noted above) and the project description provided on the NHIS Data Request Form. Please contact me if project details change or for an updated review if construction has not occurred within one year.

The Natural Heritage Review does not constitute review or approval by the Department of Natural Resources as a whole. Instead, it identifies issues regarding known occurrences of rare features and potential effects to these rare features. If needed, please contact your [DNR Regional Environmental Assessment Ecologist](#) to determine whether there are other natural resource concerns associated with the proposed project. Please be aware that additional site assessments or review may be required.

Thank you for consulting us on this matter, and for your interest in preserving Minnesota's rare natural resources. Please include a copy of this letter in any state or local license or permit application. An invoice will be mailed to you under separate cover.

Sincerely,

A handwritten signature in black ink that reads "Samantha Bump". The signature is written in a cursive style with a large initial 'S' and 'B'.
